

PRESS RELEASE

ZIWIG ENDOTEST® WINS THE PRIX GALIEN INTERNATIONAL FOR THE WORLD'S BEST INNOVATION IN THE "BEST MEDICAL TECHNOLOGY" CATEGORY

Lyon, June 24, 2024 - Ziwig is proud to announce that Ziwig Endotest® has been awarded the prestigious Prix Galien International in the "Best Medical Technology" category. This global recognition, awarded at a ceremony in Rome, celebrates excellence in medical innovation, and we are honored to join the ranks of the prestigious previous winners, pioneers in the field of healthcare.

Teamwork and fruitful collaborations

This prize rewards the hard work of our team and our partners: researchers, doctors, caregivers, patient associations, industrialists... Their trust and enthusiasm are our commitment.

Yahya El Mir, founder and president of ZIWIG: *"The field of women's health is sorely lacking in innovation. This is a powerful encouragement from the scientific and medical community to pursue our development. We are committed to pursuing our innovations to help improve the lives of thousands of patients around the world."*

Our ambition is to transform patients' lives by drastically improving their care, from diagnosis to treatment, by harnessing the new information available to us through molecular RNA analysis and AI.

Ziwig Endotest® will soon be available and reimbursed in 80 centers in France, a major step forward

Ziwig Endotest® will soon be available and reimbursed in 80 centers in France, a major step towards facilitating general access for French women to this technology, already available in 17 countries in Europe and the Middle East.

Ziwig's technology is also being developed in other therapeutic areas where the need is great: women's health, oncology, and neurology.

About Ziwig

ZIWIG KNOW BETTER, CURE BETTER. Ziwig is an innovative French company dedicated to medical innovation, specializing in the development of technologies using RNA and artificial intelligence. It operates as an ecosystem at the crossroads of several medical, scientific, and digital disciplines. It is strongly committed to disruptive innovations that support the transformation of healthcare systems towards more precise, more effective, more humane, and more accessible medicine.

About Prix Galien

Since its creation, the Prix Galien International Scientific Committee has rewarded groundbreaking medical advances that have transformed healthcare and improved the quality of life of patients around the world.
